

Renewable chemicals naturally designed and engineered to deliver the performance that adds value to everyday products

## Green Biologics Named No. 12 in *Biofuels Digest's* 50 Hottest Companies in the Advanced Bioeconomy

*Renewable chemicals company rises 10 spots in annual industry rankings*

**Ashland, Virginia and Abingdon, Oxfordshire U.K. (March 7, 2017)** – [Green Biologics, Inc.](#), the U.S. subsidiary of Green Biologics Ltd., a U.K. industrial biotechnology and renewable chemicals company, announced today that it was named the No. 12 hottest company in this year's 50 Hottest Companies in the Advanced Bioeconomy (Hot 50). The rankings, which are compiled by [Biofuels Digest](#), a leading daily news publication on the pulse of the biofuels and biochemical industries, were announced last week in Washington D.C. at ABLC 2017 and mark a significant advancement for the company as compared to last year's competition, in which Green Biologics held the No. 22 spot.

"We're very excited about this notable rise in the rankings," said Sean Sutcliffe, CEO of Green Biologics. "This recognition is a true testament to the progress we have made toward establishing ourselves as the speciality chemicals provider of choice for numerous global markets. In just the past year alone, we have strengthened and expanded our network of industry partners, [started operations and shipments at our first commercial plant](#), and [launched our first sustainable, consumer-facing product](#). This year's ranking is proof that the industry has taken notice of our achievements and has confidence in what's to come."

Considered an industry staple, this longstanding annual listing recognizes companies leading the charge in innovation and achievement throughout the fuels and biobased chemicals and materials industries. The rankings are developed based on a system that weights inputs from an invited panel of distinguished industry selectors, composed of CEOs, scientists and media among others, with votes from registered subscribers to *The Digest* and those cast through social media.

This recognition is the latest in a [string of prestigious industry accolades](#) the company has received in recent months, which include being named in the 2017 Global Cleantech 100 and recognized by the 2016 Global Clean Energy Awards as the Best Renewable Speciality Chemical Company in the UK.

### About Green Biologics

Green Biologics Ltd (GBL) is a renewable specialty chemicals company based in Abingdon, England with a wholly owned U.S. operating company, Green Biologics Inc., based in Ashland, Virginia. GBL's *Clostridium* fermentation platform converts a wide range of sustainable feedstocks into high performance green chemicals such as n-butanol, acetone, and through chemical synthesis, derivatives of butanol and acetone used by a growing global consumer and industrial products customer base. The platform combines advanced high productivity fermentation with superior-performing proprietary *Clostridium* microbial biocatalysts and synthetic chemistry to produce a pipeline of high value green chemicals with optimal performance in downstream formulations.
